

# Get a \$150 or \$400 Rebate on Select ENERGY STAR® Certified Pool Pumps

Your pool should provide fun for the whole family—not be a drain on your monthly energy costs! A properly installed and maintained ENERGY STAR certified pool pump can reduce energy use and save you money. That’s why BGE’s Smart Energy Savers Program® offers a \$150 or \$400 rebate on qualifying ENERGY STAR models.

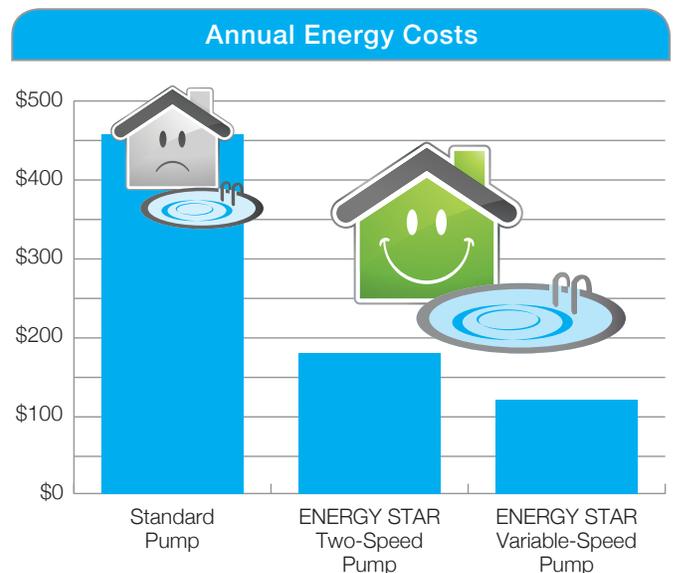

## Why Switch to an ENERGY STAR Certified Pool Pump?

ENERGY STAR models:

- Use 70% less energy than standard pool pumps.
- Save you \$280–\$340 a year in energy costs.
- Run quieter and prolong the life of your pool’s filtering system.
- Use reliable two-speed or variable-speed technology.

## How Much Can You Save?

Many pool owners don’t realize how much energy their pool pumps are wasting. Unlike standard pumps that run continuously at the same speed, an ENERGY STAR certified model can be programmed to function at different speeds to operate at the most efficient possible setting. The energy saved is considerable. Reducing the pump speed by one-half allows the pump to use just one-eighth as much energy. On average, an ENERGY STAR certified pool pump can save you more than \$300 a year.\*

Energy Savings for Standard Versus ENERGY STAR Certified Pool Pumps			
	Standard Pool Pump	ENERGY STAR Certified Two-Speed	ENERGY STAR Certified Variable-Speed
Annual Energy Cost	\$455	\$175	\$115
Annual Savings	\$0	\$280	\$340
Lifetime Savings	\$0	\$2,000	\$2,200

## What Models Qualify for a Rebate?

Select ENERGY STAR certified two-speed pool pumps qualify for a \$150 rebate, while variable-speed pumps qualify for a \$400 rebate.

Pool Pump Rebates			
Equipment	Type	Efficiency Level	Rebate Amount
ENERGY STAR Certified Pool Pumps	Two-Speed	Energy Factor $\geq$ 3.8	\$150 <sup>†</sup>
	Variable-Speed	Energy Factor $\geq$ 3.8	\$400 <sup>†</sup>

<sup>†</sup> Program and associated incentive payments are subject to change as determined by BGE. Find current rebate levels at [BGESmartEnergy.com/PoolPumps](https://www.bgesmartenergy.com/PoolPumps).

## How Do I Get My Rebate?

There are two ways to get your rebate.

1. Work with one of our participating contractors who are specially trained on how to properly install ENERGY STAR certified pool pumps. Visit [BGESmartEnergy.com/PoolPumps](https://www.bgesmartenergy.com/PoolPumps) for more information.
2. Purchase your ENERGY STAR certified pool pump directly from a retailer, and fill out a rebate application yourself. Visit [BGESmartEnergy.com/PoolPumps](https://www.bgesmartenergy.com/PoolPumps) to apply online, or print a rebate form to complete and mail in.
